

LITELID®

Model 415

Model 4245P

Description

LiteLids are patented, aluminum reflectors which fit between the top and bottom components. The Model 415 LiteLid is 15.04 inches in diameter, and is available in perforated (Model 4245P) or unperforated versions (Model 4245N).

Application

LiteLids should be utilized in light pollution-sensitive areas to redirect potentially wasted uplight into increased downward efficiencies. The LiteLid allows just enough uplight for a pleasing glow. LiteLids decrease uplight 30-40%, and increase downlight by 20-25%.

These LiteLids can be used in post top applications for LexaLite Models 200/205/210/215, and Models 424/425 post top acorn globes.

Ordering Information

Please call 800-228-5275 or 231-547-6584 for price and delivery. Typical lead time is four to six weeks.
